

Professional Summary

Full-Stack Software Engineer with 5+ years of experience building secure, scalable fintech and enterprise applications. Adept in Python (Django), Node.js, React, and cloud-based deployment (AWS, Docker). Currently leading backend architecture and compliance-driven development at Novaji Introsolve, powering thousands of secure transactions daily. Skilled in cross-functional collaboration, Agile remote workflows, and regulatory standards (CBN, PCI-DSS). Passionate about building high-availability systems with clean architecture and robust API design to support global teams and business-critical services.

Technical Skills

Languages: Python, JavaScript, TypeScript, PHP

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend: Django, Django REST Framework, Node.js, Express.js, Laravel

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS, Google Cloud, Docker, CI/CD, Jenkins, Ubuntu

Tools: Git, GitHub, Jira, Confluence, Slack

Others: RESTful APIs, OAuth, JWT, Microservices, API Integration

Domains: Fintech, Risk & Compliance, E-commerce, LMS

PROFESSIONAL SUMMARY

Versatile Full-stack Software Developer with 5+ years of experience in backend (Python, Django, Node.js) and frontend (React.js, Next.js) development. Currently specializing in innovative software solutions at Novaji Introserve, with a proven track record of building scalable web applications, RESTful APIs, e-commerce platforms, and transaction monitoring systems. Proficient in database management, cloud infrastructure, and DevOps practices. Passionate about leveraging cutting-edge technologies to drive business growth and deliver exceptional user experiences in dynamic tech environments.

PROFESSIONAL EXPERIENCE

- | | |
|---|-------------------|
| SOFTWARE DEVELOPER FULL-STACK ENGINEER, <i>Novaji Introserve</i> | 04/2023 – Present |
| <ul style="list-style-type: none">• Developing and maintaining fintech solutions using Python, Django, React.js, and Node.js for payment processing and financial services• Building secure, scalable financial APIs and web applications handling thousands of transactions daily• Implementing robust payment systems, transaction monitoring, and compliance features for regulatory requirements• Collaborating with product and compliance teams to deliver innovative financial technology solutions• Contributing to secure coding practices and financial data protection protocols in a regulated fintech environment | |
| SENIOR SOFTWARE DEVELOPER FULL-STACK ENGINEER, <i>TechNova Solutions</i> | 03/2023 – 04/2023 |
| <ul style="list-style-type: none">• Architected and implemented transaction monitoring systems with Python backend and React.js frontend, resulting in 30% faster detection of suspicious activities• Developed custom Odoo modules and Python applications for financial management and inventory tracking for enterprise clients• Engineered RESTful APIs using Django REST Framework and Node.js to integrate with third-party payment services• Built responsive front-end interfaces with React.js and Next.js, improving user engagement by 25%• Led migration of legacy systems to microservices architecture on Linux-based cloud infrastructure• Collaborated with cross-functional teams to deliver e-commerce solutions with 99.9% uptime | |
| SOFTWARE DEVELOPER BACKEND SPECIALIST, <i>GlobalLink Systems</i> | 03/2021 – 03/2023 |
| <ul style="list-style-type: none">• Created and maintained Python-based applications and services for business process automation• Developed and optimized database queries and schemas, improving application performance by 0%• Implemented secure authentication systems using OAuth and JWT for web applications• Built and integrated payment processing systems for e-commerce platforms using Node.js and Python | |

- Contributed to continuous integration and deployment pipelines using Jenkins and Docker
- Resolved critical bugs and implemented new features based on customer feedback and user stories

JUNIOR DEVELOPER | FRONTEND DEVELOPER, Pinnacle Digital

02/2020 – 02/2021

- Assisted in developing web applications using Django for backend and React.js for frontend interfaces
- Participated in code reviews and implemented feedback from senior developers to improve code quality
- Wrote and maintained technical documentation for internal use and knowledge sharing
- Created automated testing scripts to ensure code quality and reliability
- Contributed to database design and optimization efforts for web applications

EDUCATION

HIGHER NATIONAL DIPLOMA IN ELECTRICAL/ELECTRONICS,
Kwara State Polytechnic

2019
Ilorin, Nigeria

TECHNICAL SKILLS

Programming Languages

Python, JavaScript, Php

Frontend Frameworks

React.js, Next.js, HTML5, CSS3, Responsive Design, Typescript, Tailwind, bootstrap, material ui

Database Systems

PostgreSQL, MongoDB, MySQL, Database Optimization

Cloud Platforms

AWS, Google Cloud Platform, Cloud Infrastructure

Version Control

Git, GitHub

Languages

English (Fluent)

Backend Technologies

Django, Django REST Framework, Node.js, Express.js, Laravel, RESTful APIs, API Integration

Full-stack Development

MERN Stack, Django with React, Web Application Development, Laravel

DevOps & Infrastructure

Ubuntu, Docker

Operating Systems

Linux (Ubuntu, CentOS), macOS, Windows

Tools

Jira, Confluence, Slack

INTERESTS

- | | | |
|----------------------------|------------------------|------------------------|
| • Open-source contribution | • AI/ML technologies | • Financial technology |
| • Cybersecurity | • Software Engineering | • System Architecture |

PROJECTS

E-COMMERCE PLATFORM, FULL-STACK PROJECT

- Developed a comprehensive full-featured e-commerce solution using Django (backend), React (frontend), and PostgreSQL (database)
- Implemented secure payment processing, inventory management, and user authentication systems
- Deployed and maintained the application on AWS using Docker containers and CI/CD pipelines

TRANSACTION MONITORING SYSTEM, PYTHON APPLICATION

- Created an intelligent alert system for detecting unusual financial transactions using Python backend and Node.js
- Implemented real-time notification system through email, SMS, and in-app alerts using RESTful APIs
- Designed interactive dashboard for monitoring and analytics using React.js and data visualization libraries

LMS, Lagos school of programming

Built a full-stack Learning Management System for the Lagos School of Programming. The system enables instructors to manage courses and content, while students can enroll, track progress, and interact with materials. Developed a clean and responsive frontend using React, and implemented a scalable backend with Node.js and Express for handling user authentication, API endpoints, and data management. Focused on performance, usability, and maintainability.

Pcash, Fintech web app

Tech Stack: Laravel, Livewire, PHP, MySQL, Tailwind CSS Developed a secure and user-friendly fintech web application for managing financial transactions, user accounts, and reporting. Utilized Laravel with Livewire to build dynamic, reactive components without leaving the PHP ecosystem. Integrated key features such as user authentication, transaction history, wallet management, and real-time notifications. Ensured robust backend logic, clean UI, and seamless user experience.

Bank Risk Mitigation and compliance

Tech Stack: Odoo, Python, PostgreSQL Designed and implemented a custom risk mitigation system for a financial institution using Odoo to comply with Central Bank of Nigeria (CBN) regulations. Automated risk assessment processes, transaction monitoring, and enhanced due diligence (EDD) workflows. Developed custom modules in Python to flag suspicious activities, generate compliance reports, and enforce internal controls. The solution helped streamline regulatory reporting and improve operational transparency
